INTRODUCTION

The humanitarian activities of "Heart Doctors", from 1998 till the end of 2009, were accomplished in 45 countries of Africa, Asia and Europe. This work consists of offering medical services and medication to sick people, donation of medicines, provision of foodstuffs and realizing various other activities such as the creation of medical centers and hospitals, school buildings and other constructions, water supply projects etc.

The most important characteristic of the activities of "Heart Doctors" during the year 2009 is their significant increase. Increased was also the number of the countries which received humanitarian assistance. In 2009 "Heart Doctors" offered assistance (mainly foodstuffs) for the first time to 5 countries in Africa (Botswana, Guinea Bissau, Namibia, Rwanda and Tunisia) and one in Asia (Philippines).

Infrastructure activity showed considerable development; in Burundi the hospital complex at Gisuru and the project of water supply at Buramata were both completed in 2009.

School children and the general public in Greece were informed about "Heart Doctors" activities mainly by local visits which, compared to the corresponding activity of 2008, were now more frequent.

In 2009 a new type of relief was started in Burundi: cows were purchased and offered to starving families; in this way those families could have milk for their children dying from starvation.

Humanitarian relief offered by "Heart Doctors" continued in 2009 mainly to Iraq and Afghanistan (medicines). Sudan, Somalia and Zimbabwe followed (provision of foodstuffs). Less frequent were the missions to Burundi, Pakistan, Congo etc.

Very difficult and dangerous proved the missions to Gaza Strip during the wild warfare events which started at the end of December 2008 and lasted till February 2009. "Heart Doctors" accomplished 7 missions to Gaza Strip for the delivery of medicines and foodstuffs. We thank all our friends from Greece who offered to us medicines for the war victims in Gaza. All the medicines offered were delivered in time.

As always, all our missions in 2009 were accomplished by our team members who visited the victims at the remote areas of their countries where they live or at the places of natural or other disasters. Our members are volunteers and never do they get any remuneration, compensation or reward for their work.

MISSIONS FOR MEDICAL CARE

During the year 2009 “Heart Doctors” carried out 9 missions for free medical care and medication to Angola, Kenya, Burundi and Nigeria.

In certain missions for medical care, of those accomplished in Kenya and Burundi, foodstuffs were also distributed to starving families.

In the sequel we describe in brief the 9 medical care missions following the order of the time they were accomplished.

1. KENYA 7th Mission (17.1.2009)

Medical examination and treatment of patients in the area of Nairobi Archdiocese, the suburbs of Nairobi (Kymende and Longai areas) and in Massai land. Visit to the medical centre being erected at Kymende by Archbishop Makarios and financed by "Heart Doctors". Distribution of foodstuffs to starving families in the area of Molo.

Kenya, Distribution of foodstuffs

Kenya, Medical Camp

2. BURUNDI 15th Mission (28.2.2009)

Medical services were offered to the province of Ruyigi, at the villages of Muriza, Gisuru, Kirambi and the capital of the province. A 4 room school building was inaugurated at Gisuru. The construction of the building was financed by friends of "Heart Doctors". Clothing and foodstuffs were distributed to starving families at Buramata.

Burundi, Gisuru

Burundi, Gisuru

3. KENYA 8th Mission (17.3.2009)

Medical services and medication were offered to patients in Tscikuru and Kyuoso (Mwingi area) and foodstuffs were distributed to Kyuoso (corn -uga). "Heart Doctors" visited Kisumu, Kongelo and Kessengei in West Kenya. At Kongelo they met and cooperated with USA President Barack Obama's grandmother who is responsible for an orphanage there. Archbishop Makarios and the Vice President of the Republic of Kenya Mr. Steven Kalonjo Musioka assisted the team to carry out the mission.

Kongelo, with Archbishop Makarios and the U.S.A. President's grandmother

4. NIGERIA 15th Mission (31.3.2009)

After an invitation by the Consul of Nigeria in Athens, Mr. Adama, a team of “Heart Doctors” visited Benue State in Nigeria and offered medical services to communities of the following remote agricultural areas of the State: Daudu, Itapka, Echori, Adum East, Konshisha, Tarakuward, Tse Biaga, Shona and Guma.

Nigeria, Benue State

Nigeria, Benue State

Nigeria, Benue State

5. ANGOLA 2nd Mission (4.7.2009)

Medical care was offered to populations living in remote areas of the country; the following areas were visited: N'Dalatando, N'Danatolo, Golungo Alto, Lucala, Alto Dondo. Thousands of people were medically examined and given the required medication. Impressive was the number of invalid people (due to explosions of mines which had been buried in the ground during the civil war).

Angola

6. BURUNDI 18th Mission (2.8.2009)

Many patients were examined in the area of Gisuru village, Ruyigi Province. Inspection of a hospital complex construction works and visit to the Minister of health and the President of the State. Decision to add water and electricity supply installations for the hospital complex at Gisuru.

Burundi

Burundi

7. BURUNDI 19th Mission (25.10.2009)

Offering of medical services to the people of Burundi living in the provinces of Ruyigi and Karuzi. Official inauguration of the hospital complex and the school building erected by "Heart Doctors" at Gisuru. Present in the ceremony were the Vice President of the State, many other officials and crowds of people. Inauguration of the water supply project at Buramata. Distribution of cows to very poor families at Gisuru and provision of foodstuffs to hungry people at Buramata. Copy books and other material useful to school children were distributed at Gisuru and Buramata.

8. BURUNDI 20th Mission (1.12.2009)

"Heart Doctors" offered medical services to patients staying at remote areas of Karuzi Province (communes of Shombo, Gihogazi and Nyabikere). At the commune of Nyabikere the foundation stone for the construction of a school building was laid. Clothing for children and cows were distributed. Foodstuffs were donated to families at Buramata.

9. KENYA 10th Mission (6.12.2009)

Medical services, medicaments and foodstuffs were offered to inhabitants of Nairobi in cooperation with Archbishop Makarios and the Cypriot Organization "Sofia Foundation for Children". The mission was accomplished in the slums area of Kibera and at an orphanage of the Archdiocese of Nairobi operating in Niyeri area.

Kenya

ILLNESSES

The problems of health we have observed in the populations we visited during the year 2009 are not very much different from those of the previous year 2008. Malaria is the most frequent serious illness attacking without discrimination young children and grown-ups of all ages. Infections of the respiratory, urinary and reproductive systems, parasites, problems of the eyes, high blood pressure, arthralgias and pains of the back, gastroenteritis and gynecological problems, chronic wounds, HIV/AIDS, skin diseases (including scabies and leprosy) are observed in the populations of nearly all the places we visit. Young children suffer relatively more from helminthiases, scabies and kahexia. Food habits of certain populations are critical for their health conditions (for instance, hypertension in Nigeria is due to the consumption of salted fish). Lack of water in certain countries and the habit of people to drink water from pits, lakes and rivers without boiling it results in gastroenteritis and parasites.

MISSIONS FOR DELIVERY OF MEDICINES

During 2009 medicines were delivered to the following 5 countries: Afghanistan, Burundi, Iraq, Kenya, Palestine (Gaza Strip).

Countries which have become theatres of violence and war (Iraq, Afghanistan, Palestine - Gaza Strip) faced very serious needs for medicines in 2009. In previous years the needs for medicines were increased by natural disasters (earthquakes, floods, tsounamis, cyclones and typhoons).

Because of the dramatic warfare activities in Gaza Strip, missions for delivery of medicines and foodstuffs to Caza were very difficult indeed.

MISSIONS FOR PROVISION OF FOODSTUFFS

Countries of low level of living such as Burundi, Ethiopia, Somalia, Guinea Bissau, Madagascar, Niger, Zimbabwe, Mozambique etc., suffer from serious shortages of foodstuffs. In these countries malnutrition and kahexia affect gravely young children. Prolonged droughts and floods destroy crops (India, Burundi, Kenya etc.) thus worsening the bad situation. Refugees and violent internal movements of human masses for various reasons (Sudan, Democratic Republic of Congo, Kenya, Pakistan, Iraq etc.) create great needs for feeding large human populations.

The food items provided as food relief are the so called staple food commodities which are basic with respect to nutrition (they have high feeding value and may be easily stored and preserved under usual conditions) : rice, corn, wheaten flour, sorghum, beans, powdered milk. In certain cases bottled drinking water is distributed with foodstuffs.

The distribution of food aid is very often a serious problem because hungry populations are uneasy, impatient and sometimes they may become violent (the usual case is that of people snatching the distributed quantity so eagerly that they hurt and wound by their nails the arms of the persons making the distribution). In other cases the same persons follow repeatedly the queue and get the quantity prescribed for one person or family more than once. Sometimes starving people intend or even try to take the food away obeying no rules of orderly allocation (Iraq, Al-Basra). Sometimes they keep waiting through the night near the car carrying the foodstuffs hoping to get the food somehow or other (this is why we sleep on the car). To secure the orderly distribution we often use armed soldiers.

Usually foodstuffs are bought packed up in bags or boxes in such a way that a bag is given to one person or family. To avoid exploitation, when foodstuffs are distributed to school children at the school, parents are called to escort their children. In case food relief is given to large groups or tribes, the corresponding chiefs are called to receive and distribute the relevant quantity. For distribution in refugee camps the problem is usually very simple because refugees have their own store houses and storehouse keepers : they receive, keep and use food items by themselves.

During the year 2009 "Heart Doctors" offered foodstuffs to Afghanistan, Bangladesh, Congo (Democratic Republic), Guinea Bissau, India, Indonesia, Madagascar, Mozambique, Pakistan, Philippines, Rwanda, Somalia, Sudan (Khartoum, Darfour), Tunisia, Zimbabwe and Palestine (Gaza Strip).

We have to explain that in certain medical care missions to Burundi and Kenya, in addition to medical care and medicaments given in 2009, foodstuffs were also distributed to starving populations.

Distribution of foodstuffs in Madagascar (rice)

MISSIONS FOR OTHER PURPOSES

During the year 2009 various other missions were accomplished for the indicated special purposes in the following countries:

1. Benin (inauguration of a building erected by "Heart Doctors" at Porto Novo to accommodate the homeless blind people of the capital of Benin).
2. Botswana (bedding, clothing and construction of a school building for an orphanage in Gaborone).
3. Burundi (inspection of building works for the hospital complex at Gisuru).
4. Namibia (clothing, footwear etc. for an orphanage in Windhoek).

INFRASTRUCTURE

1. ACCOMPLISHED PROJECTS

Hospital complex at Gisuru, Burundi

The hospital complex which is being built during the last two years at Gisuru, Ruyigi province, Burundi, consists of the following units :

- General clinic
- Pediatric clinic
- Operating theater and surgical clinic
- Maternity unit
- Laboratories
- Doctors residence
- Administration

Electricity and water supply for supporting the proper functioning of the hospital have been secured by special projects.

On the 29th of October 2009, the official inauguration ceremony of the whole complex took place. Present were the Vice President of the Republic of Burundi, the Minister of Health, the Governor of Ruyigi, the Medical Officer of Ruyigi, the local authorities and crowds of people. The Vice President addressed the large gathering and spoke highly of Greece and "Heart Doctors" for their assistance to the people of Burundi. The Vice President of "Heart Doctors" spoke and promised to continue assisting Burundi. Mrs. Kalpaktsoglou, who covered the construction costs of the pediatric clinic, addressed the people present in the ceremony. Commemorative plates were fixed on the walls of certain buildings of the hospital.

Administration Building of Gisuru Hospital, 2009

Pediatric clinic at Gisuru

Operating theater

The operating theater was properly equipped. Furniture, blankets and bedding was given for the whole hospital.

The hospital covers the needs of a large area inhabited by more than 100.000 people.

Pediatric Clinic, Gisuru
 Sponsored by Mrs. Paraskevi Kalpaktoglou

School building at Gisuru, Burundi

The school building constructed at Gisuru consists of 6 independent large rooms and an office for the school master and the teaching staff. The whole project was carried out in two phases. First the four rooms were finished and then the other two and the office of the school master were added. The official inauguration took place on the 29th of October 2009.

Water tank for the school at Gisuru

The new school at Gisuru

School building in Gaborone , Botswana

On the 16th of December 2009 the school building constructed in Gaborone was ready; the school will house the school children of an orphanage in the capital of Botswana.

Water supply project at Buramata, Burundi

"Heart Doctors" constructed at Buramata village the first school building and then a medical center. As a result, masses of people started gathering at Buramata. The population of the settlement increased rapidly after a friend of "Heart Doctors" constructed at that area 300 small houses for the homeless people. After this development, the existing water supply was insufficient and people had to walk a long distance to fetch water for their needs. "Heart Doctors" decided to finance a water supply project to bring water to the establishment from a distance of two kilometres (using water tanks and water pipes). The work was completed and inaugurated on the 29th of October 2009.

Inauguration ceremony of the water supply project at Buramata (sponsored by Mrs. Paraskevi Kalpaktsoglou)

Water tank at Buramata.

Medical center in Kenya

In 2009 the Archbishop of Kenya Makarios completed the construction of the medical center at Kymende near Nairobi. This project was financed by friends of "Heart Doctors". The construction works have been supervised by the Archbishop.

Home for the homeless blind in Porto Novo, Benin

A member of "Heart Doctors" financed the construction of a building in Porto Novo, the capital of Benin, in order to accommodate poor and homeless blind people. The official inauguration of the building was performed by the Archbishop Alexandros of Nigeria on the 12th of June 2009. Present for the event were the Consul of Russia, members of the local Christian Community and members of "Heart Doctors". The whole project has been under the supervision of the Archbishop of Nigeria.

2. BUILDING WORKS IN PROGRESS

School building at Nyabikere, Burundi

At the beginning of December 2009 the foundation stone was laid for the construction of a school building at Nyabikere village, in the province of Karuzi, Burundi. The school building is expected to be ready in three month's time.

The old school at Nyabikere.

Medical Center at Agagbe, Benue State, Nigeria

The very old building housing the medical center at Agagbe in Benue State of Nigeria has been demolished and a new building is being constructed at the same place. "Heart Doctors" are financing the project.

ACQUISITION OF MEDICINES, FOODSTUFFS AND OTHER NECESSARY COMMODITIES

Most of the medicines used by "Heart Doctors" for their missions are offered to them by various friends (school children, employed and unemployed individuals, pensioners, various firms, associations, municipalities, utilities, hospitals etc.). Medicines not available or not produced in Greece are bought from abroad (medicines against malaria and other tropical diseases).

Foodstuffs, drinking water, blankets and bedding, medical equipment, beds, desks, clothes, toys, schoolbooks etc. are purchased from local markets which are as close to the populations receiving the relief items as possible. It must be noted, however, that clothes for children and blankets have been offered to the Organization by friends from Greece.

Many friends from Greece bought the cows we distributed to very poor families in Burundi in 2009 (to make sure that the families in question could have some milk for their starving little children to protect them from dying). A little child at the breast was dying because his mother had no milk to breast-feed it. "Heart Doctors" managed to find a villager who had a cow and paid him to give the child one kilo of milk daily for three months. Later "Heart Doctors" were very happy to see that the child was safe and in good health. Thus, friends were asked to buy cows and donate them to poor families in Burundi.

INFORMING THE PUBLIC AND PRESENTATION OF THE ORGANIZATION

"Heart Doctors" are very much interested in providing information concerning their activities. By doing so, they mainly explain what they are doing and express their thanks to those who contribute to their humanitarian work. They let their friends know about the missions and other activities of the Organization either by visiting the relevant internet web site of "Heart Doctors" or by using texts and other means of information (yearly reports, DVDs, press releases etc.). Groups of "Heart Doctors" members use to visit schools, hospitals, Organizations etc. to meet school children, students and the teaching staff, employees, officials in municipalities etc. in order to thank mainly those who collect and offer medicines and discuss with them the problems, difficulties and the situation "Heart Doctors" face in their missions. Personal correspondence is also used to inform and thank individually the contributors.

During the year 2009, "Heart Doctors" were present in the following meetings, presentations, honorary ceremonies etc.

21.1.2009. The President of "Heart Doctors" presented to the Social Affairs Standing Committee of the Greek Parliament the humanitarian work accomplished by the Organization.

26.1.2009. Visit and speech by the Vice President of "Heart Doctors" to the students of Varvakion High School.

10.2.2009. Visit and speech of the Vice President of "Heart Doctors" to the students of the Hellenic - French School of Piraeus "Saint Paul".

26.2. 2009. Honorary ceremony at the Town Hall of Kalyvia Thorikos Municipality in honour of Mrs. Helen Sotiriou, Vice President of Heart Doctors, by the Lagonisi Women's Association. Present were the Mayor Mr. Petros Philippou, members of Parliament and other officials, local citizens and many friends.

10 – 11.3.2009. A "Heart Doctors" team visited 5 schools in Imathia of Macedonia (primary school and gymnasium-lyceum of Irinoupolis, gymnasium of Kavasila, 4th gymnasium of Veria, 1st lyceum of Naousa) and the University of Thessaloniki (Department of Philosophy).

3.3.2009. Visit to the 2nd vocational lyceum of Nea Philadelfia in Athens.

13.3.2009. The President of "Heart Doctors" participated as an invited speaker in a scientific symposium on "transfusion therapy" (Zappeion, "Egli" congress center).

27.3.2009. The President and Vice President of "Heart Doctors" visited the deputy minister of Foreign Affairs Mr. Miltiadis Varvitsiotis to inform him about the humanitarian activities of the Organization.

25.5.2009. A team of "Heart Doctors" visited an icons exhibition at the building of the American School of Classical Studies (organized in support of Archbishop Alexandros' mission in Nigeria: construction of a school building in Imo State).

26.5.2010. The two Vice Presidents of "Heart Doctors" visited the humanitarian Organization "Sofia Foundation for Children" in Nicosia; this Organization supports the work of Archbishop Makarios in Kenya.

15.6.2009. Seven "Heart Doctors" members visited the Kindergarten at the municipality of Erythres.

26.6.2009. Speech by the Vice President of "Heart Doctors" at Rodini, Rhodes; the meeting was organized by Young Christian Women Association in Rhodes.

22.7.2009. Speech by "Heart Doctors" Vice President at the island of Leros (the meeting was organized by the Greek Girl Guide Movement at Leros).

27.7.2009. A team of "Heart Doctors" paid a visit to the Ambassador of Angola in Athens and informed him about the recent 2nd mission of the Organization to Angola.

20.10.2009. Visit of the two Vice Presidents of "Heart Doctors" to the Photography Exhibition in Nicosia, organized by "Sofia Foundation for Children".

10.12.2009. A team of "Heart Doctors" visited "Alexandrion" Technological Educational Institution (TEI) in Thessaloniki after an invitation by the Association of Special Technical Staff. The Vice president spoke to a gathering of students and the teaching staff.

10.12.2009. A team of "Heart Doctors" visited the Municipality of Menemeni in Thessaloniki. The Vice President addressed a large audience in "Astron" cinema.

11.12.2009. A team of "Heart Doctors" visited the "Ethnological Museum of Thrace" and the primary education schools "Domna Visvizi" and "Academy" in Alexandroupolis.

23.12.2009. A team of "Heart Doctors" visited the Gymnasium of Anixis.

Mr. **Elias Mauroudis**

THANKS

We express our warmest thanks to all the people of Greece who offer to us many of the medicaments we use for our missions. Many friends send to our Organization medicines regularly without expecting a major disaster such as a war or an earthquake to occur and then to do so; they know that sick people exist always in our world.

Poor people, advanced in years, pensioners, even unemployed, visit our offices to offer enthusiastically a few medicines they can afford. Most of all we thank the children and the young of all our educational system; they do not forget the sick children and the suffering of all ages who struggle to survive in the battle-front of epidemics and sickness, natural disasters, war, drought, malnutrition and starvation. We are touched by their contributions.

Medicines, blankets, clothing etc. are sometimes transported from the islands and remote cities of Greece to main cities and from there to our offices or storehouse in Athens by private transport agencies or buses free of charge. We thank them all.

To our friends who have financed the projects of "Heart Doctors" in Burundi, Kenya, Benin and Botswana we express our appreciation and thanks. Apart from those who prefer anonymity, we mention the following:

- The Anglo-Hellenic League, London (covering part of the construction costs of the operating theater at Gisuru, Burundi).
- Communauté Hellénique de Luxembourg (covering part of the construction costs of the hospital complex at Gisuru, Burundi, by the amount of money collected by the children singing the Christmas carols in 2008).
- Bazar International de Luxembourg, Greek Pavilion (covering part of the construction costs of the hospital complex at Gisuru, Burundi).
- Ecole Européenne de Luxembourg (covering part of the construction costs of the operating theater, hospital complex at Gisuru, Burundi).

For the pediatric clinic in the hospital complex at Gisuru, Burundi, and the water supply project at Buramata village, Burundi, we thank Dr. Paraskevi Kalpaktsoglou who covered the whole building costs of both projects.

For the support of many very poor families living in Gisuru and Karuzi, to have a little milk for their underfed young children, cows were bought and distributed (one cow to each family). We thank all our friends who bought the cows and offered them lovingly and willingly.

The Journalists Mr. George Georgiadis, Mr. Petros Katsakos and Mr. John Kanellakis, who come with us in certain of our missions, Mr. Filios Stagos and all who present our work in journals, radio and television in Athens, Thessaloniki, Rhodes, Serres etc. we thank very much.

Informal groups of friends are formed in various places of Greece (Athens, Thessaloniki, Rhodes, Serres, Drama, Imathia, Amynteo, Alexandroupolis). They are volunteers and act modestly and unobserved mainly for the collection of medicines. We thank them and their leaders.

We are thankful to the top managers, the leading staff members and the employees of the air companies Lufthansa, Egypt Air, Aegean and Emirates for their assistance and care with respect to our traveling.

"Heart Doctors" cooperate closely with the Patriarchates of Alexandria and Antiochia and the Archbishops Alexandros of Nigeria, Makarios of Kenya and Gregorios of Cameroon. All the aforementioned and generally the Clergy of the Orthodox Christian Church we thank heartily.

Warm thanks are expressed to the Minister and Deputy Ministers of Foreign Affairs of Greece, the General Directorate of International Developmental Cooperation (YDAS), the staff members in charge and the employees of our Diplomatic Services in Khartoum (Ambassador Mr. Charalampos Karapanos), in Nairobi (Chargé d' Affaires Mr. Alexandros Bountouris), in Bujumbura (Honorary Consul Mr. George Coucoulis) and in Antananarivo (Honorary Consul Mr. Panagiotis Taloumis).

For the local preparation of our medical missions to the African countries, excellent work has been done by Mr. Umaru Tanko Kuta (State of Niger, Nigeria), Mr. Biem, Secretary of Special Duties (State of Benue, Nigeria), Mr. Victor and Mr. Jacob Kanu (Sierra Leone) and Mr. Bucumi Moise, Minister of Energy and Mineral Resources (Burundi). We thank them all.

We also thank The President of the Democracy of Burundi Mr. Pierre Ngurunziza, the Vice President of the Democracy of Kenya Mr. Steven Kalonjo Musioka and Dr. Gabriel T. Suswan, Executive Governor of Benue State, Nigeria.
